

We Find the Way

NX LIFESTYLE LOGISTICS SWISS SA

NX Group Corporate Message

WE

Our unified strength makes us unique, driving everything we do on the frontline and in the background to deliver unparalleled logistics services. The word "we" speaks to a complex system of individuals with specialized skills that work together to become an unstoppable force.

FIND

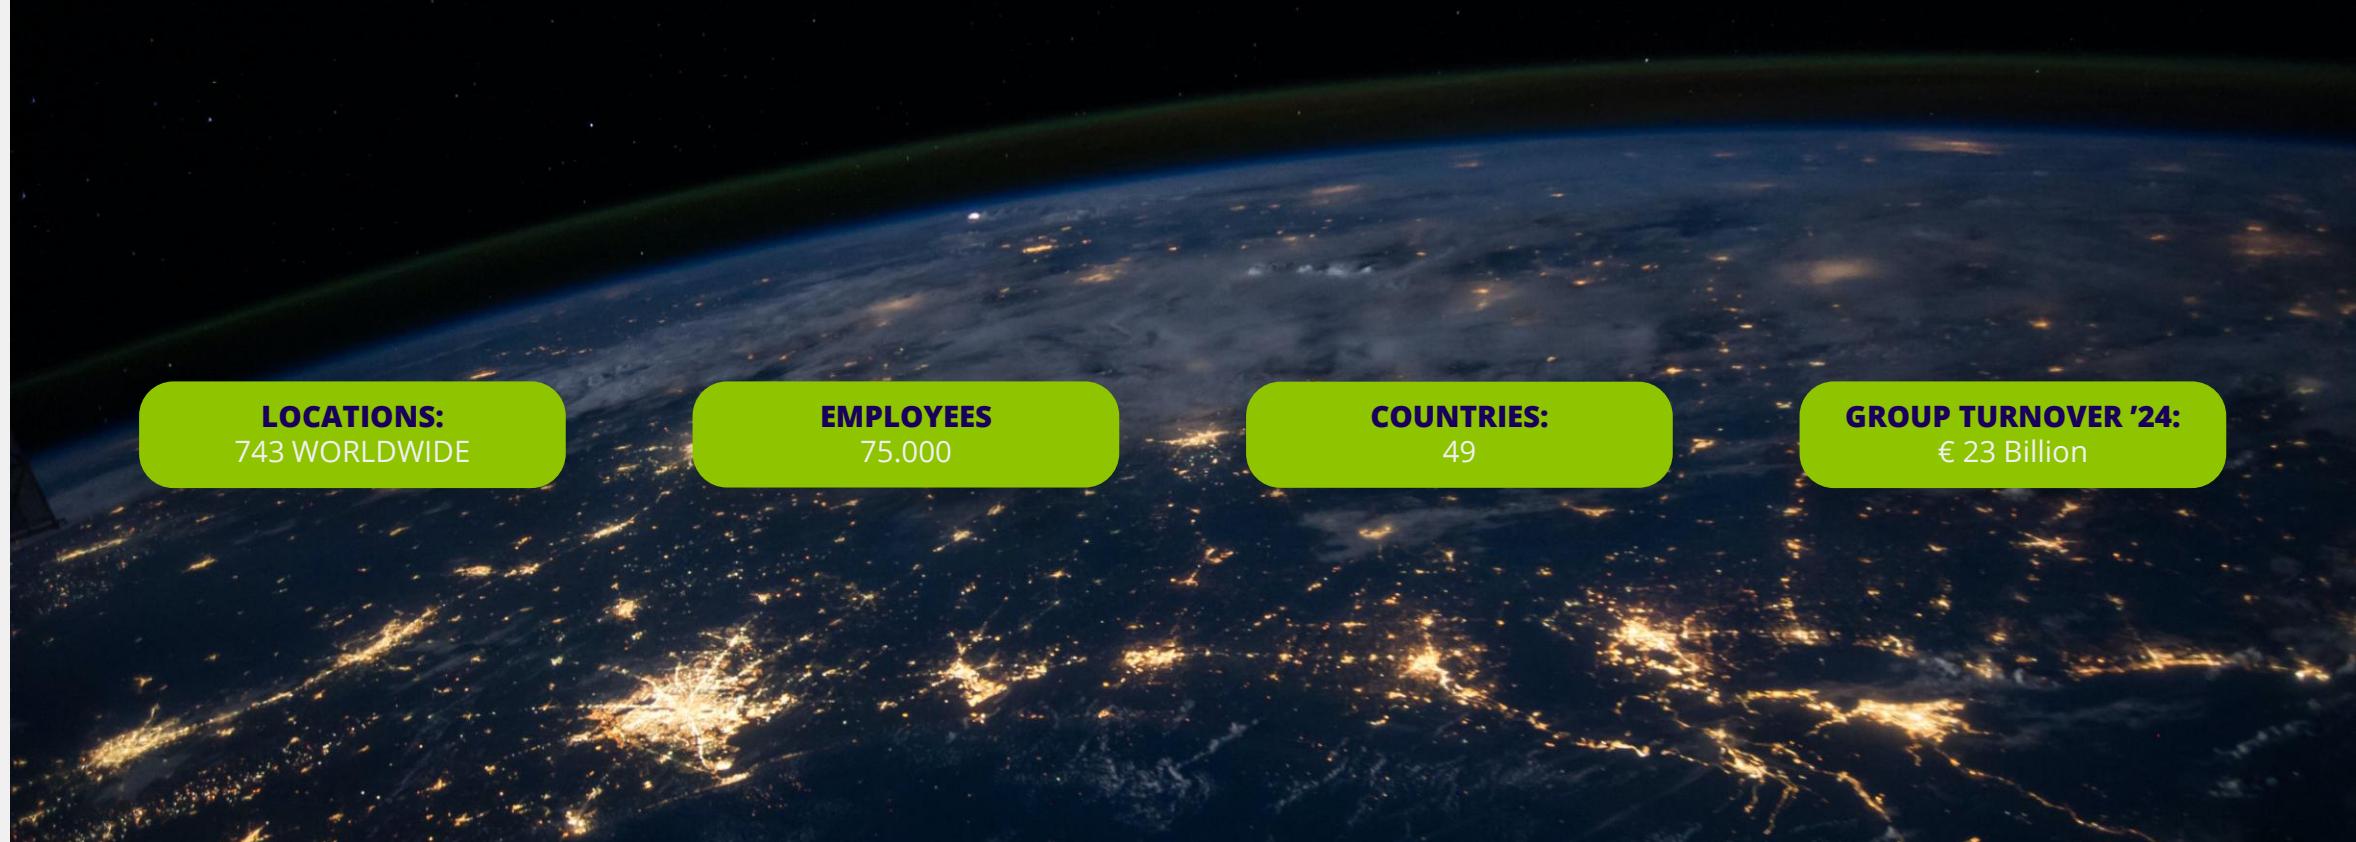

Every client, project, and task is different, and sometimes we have to innovate to achieve our goals. Our work demands exploration and thinking outside the box.

It's how we find the best way. The verb "find" in its present form tells a story of a company willing to dig deeper for the best results.

THE WAY

Sure, there are many solutions, but there's only one best way. We don't find a way or some way; we find the best way, and we do it with passion and perseverance. Our efforts build connections to and between individuals and businesses.

History NX

THE PATH WE ARE WALKING TOGETHER

- Nippon Express entered the Italian market in the early 2000s with Nippon Express S.r.l. In 2020, following the acquisitions of Franco Vago and Traconf, the company became NIPPON EXPRESS ITALIA S.p.A. In the following years, strategic companies such as Tramo, e.Fashion Software and Hub&Logistics SA were also acquired.
- The headquarters is located in Scandicci, Florence.
- NX Italia integrates the services and excellence of all five companies, unifying them into a single point of contact, enhancing efficiency, and creating new opportunities.

CONTRACT & LOGISTICS

Contract Luxury Division transforms every project into a unique experience, offering turnkey solutions designed for both private and public clients who seek excellence and attention to detail.

Our mission is to exceed expectations, guiding clients through a journey built on listening, passion, and professionalism.

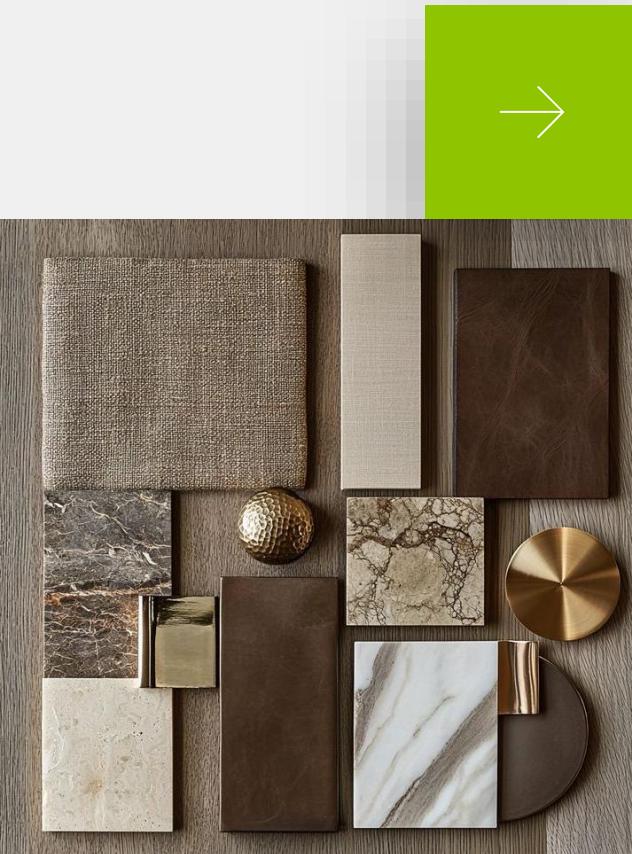

From design to the production of fixed and movable furnishings, from logistics to installation, up to testing and after-sales service — every phase is handled with the utmost care, ensuring quality while respecting budgets and timelines.

1. Interior Design

- **3D Modeling / Rendering**
- **Concept**
- **Moodboard**
- **Executive Project**

Interior design is not limited to aesthetic choices, but is the result of a structured technical process that integrates functional analysis, ergonomics, materials, and building systems. Every project is unique and tailored to the specific needs of the client. We adopt a multidisciplinary approach that combines expertise in interior design, lighting design, and executive planning. We follow the project through each phase, transforming functional and aesthetic requirements into customized spaces that reflect the practical needs of those who live in them.

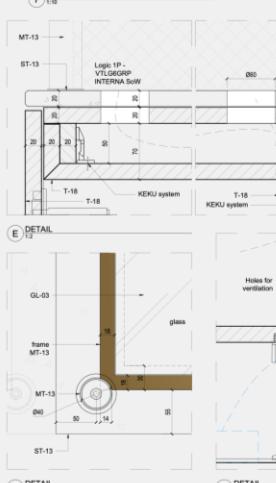

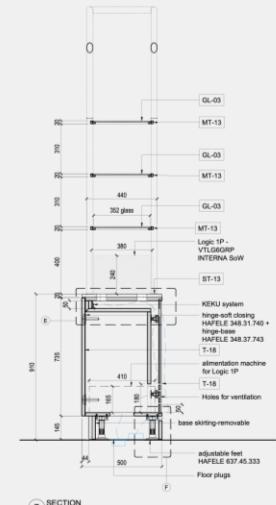

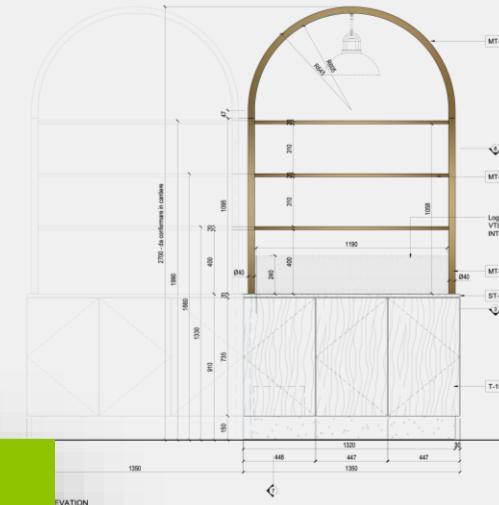

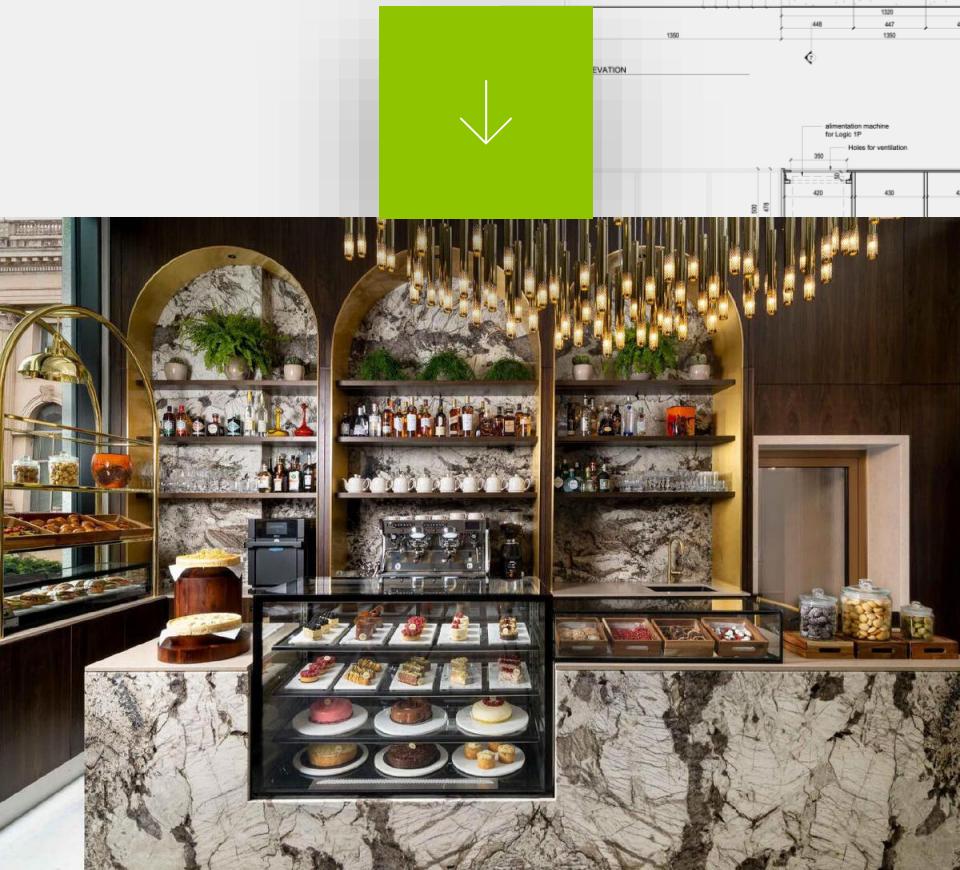

2. Furniture Engineering

SECTORS:

- Residential
- Retail
- Hospitality
- Restaurants
- Naval

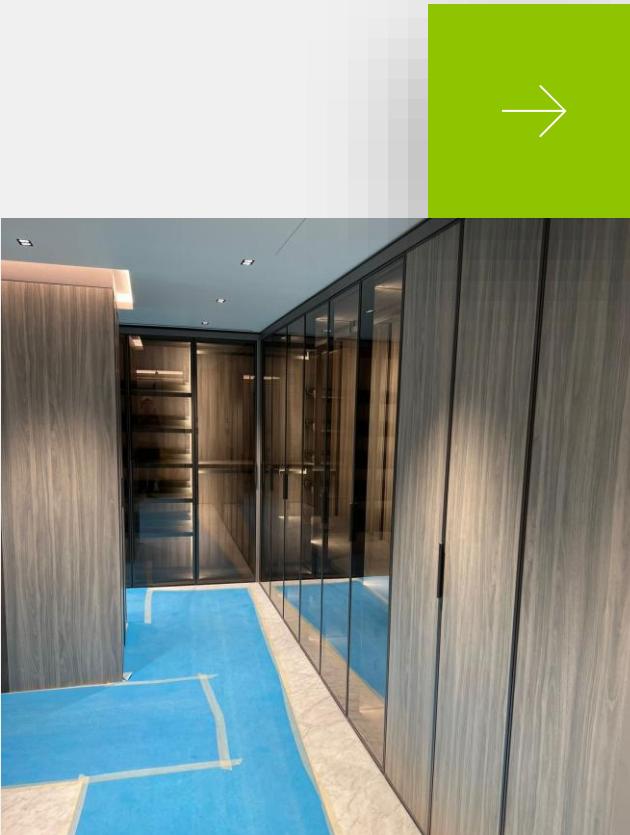

We develop and transform the creative concept into concrete, feasible technical solutions. Through the development of construction details, material analysis, and the verification of functionality and manufacturability, we ensure that each custom-made furnishing element meets quality, aesthetic, and structural standards.

3. Executive Coordination

- **Survey**
- **Construction Book**
- **Project Management**
- **Site Management**

Construction site management in interior design means organization, precision, and control at every stage. Each intervention is translated into detailed technical documents (plans, sections, construction details, material specifications), essential for execution and coordination of the workforce. We oversee the entire process up to delivery, through the management skills of Project Managers and Site Managers, ensuring quality and compliance with deadlines.

4. Logistics

- **Transport**
- **Customs**
- **Warehouse**
- **Logistics**
- **Delivery Assistance**

Our furniture transport service is built on a solid and long-standing multinational organization, able to guarantee efficiency, punctuality, and international coverage. At the same time, we cultivate a dedicated, craft-like approach: every shipment is handled with care, attention to detail, and full consideration of the client's needs. In this way, we combine the strength of a large group with the closeness and precision of a tailor-made service.

5. Installation

- **Delivery to floor**
- **Assembly**
- **Positioning**
- **Installation of custom furniture and boiserie**
- **White Glove Service**

Our furniture installation service is based on many years of experience and woodworking expertise, ensuring professionalism and precision in every intervention. We are able to install any type of furniture, from the simplest to the most complex, guaranteeing solidity, functionality, and a flawless finish. Each installation is carried out with the mastery of true craftsmen, to deliver a result that enhances the value of your furnishings
